

Telemedical Cart

Easy to deploy. High flexibility and high mobility.
Collecting patient vital signs from multiple devices. Plug and play.

Isolation room/ICU/Telehealth

Integrates a wide selection of devices:

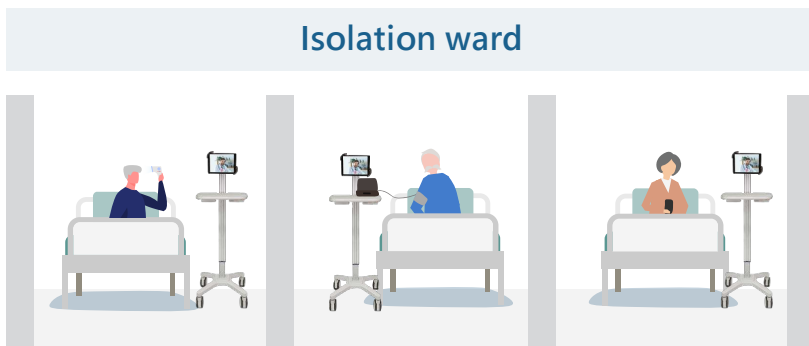

oximeter, Sphygmomanometer, CPAP, smartwatch and more

- Wireless portable cart allows for quick isolation ward set up
- Utilizes hospital's private cloud to protect patient data
- Integrates various devices for centralized data collection

Health management platform ensures consistent data collection even at a distance

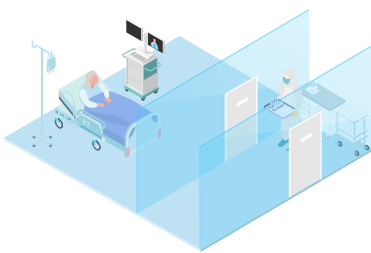

- ✓ **Care management:** patient data, vital signs history, and health remarks
- ✓ **Data analytics:** measurement data, device utilization rate, and data charts
- ✓ **Device management:** view connection status, categorize devices, set measurement standard values

Real time 4K videos to support various applications

1 Isolation ward

Reduce foot traffic to lower contamination risk

2 Teleconsultation

Instant retrieval of patient data for a new way of consultation

3 Remote teaching

Real-time video to provide accurate teaching materials

Wide selection of devices tailored for your needs

Standard

Oximeter

Thermometer

Sphygmomanometer

Optional

CPAP

Smart glasses

Smart watch

Blood sugar meter
